(54) Composite package for scoopable products

(57) A composite package for scoopable products comprising an outer rectangular paperboard box (12) having vertical front (16), rear (18) and side walls (20, 22) and an upper foldable flap assembly (26) connected to the vertical walls. An inner thin-walled plastic jar (14) has a lower, generally rectangular portion (29) fitting within the box and an upper portion of slightly reduced cross-sectional size provided with a large open mouth. The lid (72) is removably connected over the mouth and is normally covered by the flap assembly. The upper portion has wall sections spaced inwardly from opposed walls of the box to provide finger receiving spaces (54, 56) therebetween, and the opposed walls have finger receiving openings (58, 60) adjacent the spaces to facilitate handling of the box.
